### **Reasons For Allowance**

1. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims is the inclusion of "*under the control of bootloader software, automatically downloading extension software into said common platform; executing the downloaded extension software; under the control of the downloaded extension software, determining the type of said equipment sensor; responsive to a result of the determining step, downloading application software corresponding to the type of equipment sensor into said memory, wherein the application software is used for configuring the common platform for use with the equipment sensor; and executing said application software.*" in all of the independent claims. Razavi et al U.S patent no. 6,362,730, Anderson et al. U.S patent # 6,578,142, Larson et al. U.S. patent no. 6,556,904 B1, Dodson U.S. patent no. 6,513,159 B1, Larson et al. U.S. patent no. 6,370,455 B1, Leyda U.S. patent no. 5,867,730, do not have these limitations.

As a matter of facts, Razavi only discloses, "*Devices may easily be connected or disconnected to upgrade or reconfigure the vehicle's systems, and software and services can easily be provided to the various devices through the network. The network can enable the interaction of various network devices to increase the capabilities or utility of devices*" (see Abstract).

Anderson only discloses, "*booting up an operating system and executing the first application; determining if a suitable connection exists, determining if a needed bandwidth of the suitable connection is available, and downloading a second application*

Art Unit: 2142

*if the suitable connection exists and the needed bandwidth of the suitable connection is available.” (col. 1, lines 55-67).*

Larson '904 only discloses, *“A wheel alignment system that includes at least one sensing device for acquiring automobile data, interface circuitry in communication with the sensing device for generating data representative of automobile data acquired by the sensing device, and a host computer in communication with the interface circuitry for performing a sequence of operations on data generated by the interface circuitry.” (col. 4, lines 36-45).*

Waldi only discloses, *“The system evaluator evaluates the hardware configuration of the computer. The driver evaluator determines the drivers installed on the computer. The installation program assembles a stack from the hardware configuration, and compares the stack with a valid package matrix. If a match is found, the installation program then compares the drivers in the matched stack with the drivers installed on the computer to determine which drivers need to be installed and which drivers need to be updated.” (see Abstract).*

Larson '455 only discloses, *“the remote diagnosis, repair, and updating of software applications on vehicle wheel alignment systems from a remote computer system via communication link.” (col. 4, line 56 – col. 4, line 11).*

Leyda only discloses, *“the automatic identification and configuration of a peripheral device, like CD-ROM drive. An initialization program executes a query instruction, which includes an identification request to the peripheral device. A response from the peripheral device includes identification data for the peripheral device. The response,*

Art Unit: 2142

*including the identification data, is interpreted to permit the selection of one of the plurality of driver files corresponding to the identified peripheral device type. A driver loader then loads the selected driver file.” (col. 1, line 55 – col. 2, line 4).*

2. The Examiner's interpretation of the claim language is based upon Applicant's the arguments received on 09 September 2004 (pages 21-29) and the enabling portions of the specification, (Fig. 3, Abstract, pages 11-13). Therefore, Applicant's instant claims are considered to be allowable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. **Claims 1-53** are allowed.
